ACCESS PANELS

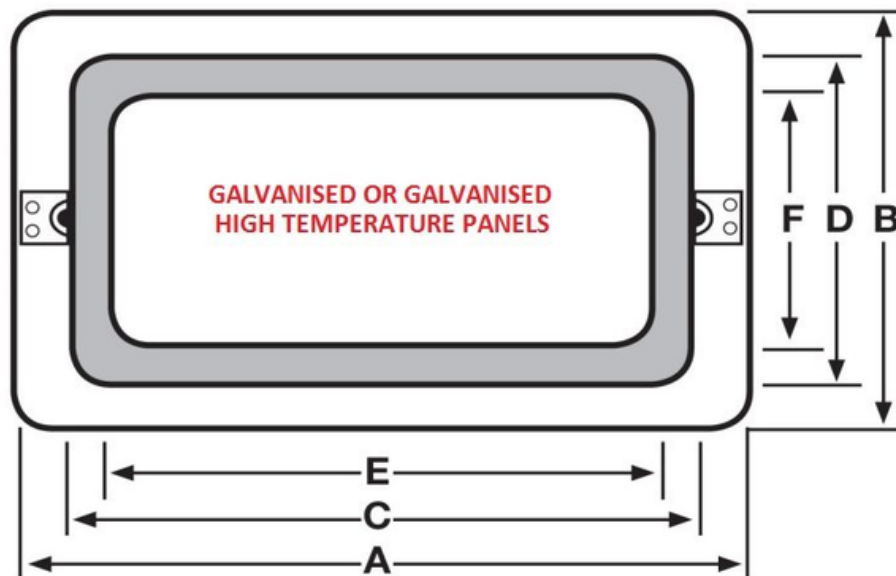

Available In

- **Galvanised**
- **Galvanised High Temp
(Fibreglass seal)**
- **316 Stainless Steel**

Bullock offers a high-quality access panel solution specifically designed for the air conditioning industry, providing an efficient and reliable method for accessing rigid air conditioning ducts and conditioner housings. These access panels facilitate equipment maintenance and cleaning, crucial for ensuring the proper functionality and safety of key components like fire dampers, smoke and volume dampers, variable air volume units (VAV), duct heaters, coils, and filters. By allowing easy access, these products help ensure strict compliance to AS1682.2-2015 & AS4254-2012.

- **FRAME:** Made from press formed galvanised steel 0.8mm – 1.0mm
- **PANEL:** 2 piece press formed 0.6mm – 0.8mm galvanised steel
- **STANDARD SEAL:** 1 piece heat welded PVC compression gasket formed to ensure air tight seals
- **HIGH TEMP SEAL:** E Glass Fibre Rope (EGT16) rated to 500 deg. C
- **LOCKS:** 2 or 4 galvanised steel sash fasteners. Combining a specially designed hook and cam system to give an airtight seal between the panel and its frame.
- **INSULATION:** Thermal and acoustic 25mm fibreglass insulation is sealed airtight within the sandwich panel via the PVC seal
